

Installing of Antennae on the Millennium Business Park Building.

It is a policy of the Century City Property Association (CCPOA) that all buildings within the Century City precinct, keep to an absolute minimum, any and all antennae, aerials, etc. For this reason, the Trustees of Millennium Business Park took the decision to make facilities available within the park for each unit to connect to [Century Connect's Open Fibre Optics Network](#). This makes broadband data, voice and ipTV readily available to the tenants of the park at a very nominal installation cost.

The trustees therefore encourage all tenants to first investigate the use of Fibre as their means of communication.

If Fibre cannot be used, then before the Trustees will consider an application to install Antennae on the building, the owner or tenant must first apply and receive permission from the CCPOA. Please study the rules and procedures on the Century City Website.
